SUBJECT: OUTCOME OF THE ST. LOUIS PARK COUNCIL MEETING, JANUARY 11, 1982

Last night I attended a special meeting of the St. Louis Park City Council. The meeting began with a brief introduction by Mayor McQuaid and City Manager James Brimeyer to the report entitled, "Terminating An Endless Search; An Action Approach to Solving the Water Problem." Mr. Brimeyer distributed the attached memo, historical time line and projected time line. The councils discussion regarding the report focussed on the lack of a drinking water standard for PAH compounds and the lack of progress in mitigating the ground water problem since it was discovered in 1975.

The council approved the report and the projected time line for execution of the reports recommendation. The city intends to widely distribute the report to those identified in the memo, and then initiate a series of meetings to elicit support for the report's recommendations.
